## Experience

### Product Designer UI/UX (Web Design) Freelance (Oct 2014 - 2019)

I worked on mobile products from various industry (Automotive, Social Media, Medical, Sports Science) by creating high fidelity wireframes and mock-ups but also prototypes that mimics real-life micro interactions. As a product designer (UI/UX) I have delegated design teams to solve design problems, create design systems, elegant experiences based and machine learning technologies for numerous companies on a contract base.

### TMZ News Desk / Web Design (July 2017 - March 2018)

My role in the company was to manage every asset of the TMZ and TMZ sports website by providing visually appealing contents. In addition, I also had to work closely with Senior UX, SEO and Engineers to create high quality mobile user interfaces assimilated with the site. I partner with the UX research team to better understand the need of our customers

### Owls Web Design (March 2015 - Nov 2015)

Owls web design is a small business that offers professional, custom built wordpress websites. I worked there part time as a junior graphic designer. My role was to designed logos and helped client build their branding identity and email marketing strategies.

## Education

### The Academy of Art University San Francisco (Master of Art 2018-2019)

Master of Art in web design and new media.

### The Art Institute Of California San Diego (Bachelor of Science 2013-2016)
